Big Stag Party Was Held Last Thursday Night

Two Prospective Grooms Spend A Last Night With Pals

A stag party was held at the home of Mr. Manney Schneider last Thursday evening in honor of Messrs. Wilf Thompson and Alex Patterson who were on the eve of taking the great matrimonial leap, which they did the following day, Friday.

A number of friends of the condemned men gathered together to commemorate their last night of single blessedness or perhaps we should have said coisidness.

The mourners consisted of about thirty tried and true friends who through their tears of sympathy, unanimously wished, both Wilf and Patterson, through their mutual friend and advisor, David Broadfoot, all the luck that could be crowded into a long and happy married life. The groom-to-be rose to the occasion admirably and thanked their many friends for the celebration in their honor, both individually and collectively.

Everyone present reports an enjoyable time owing to the good fellowship shown by all.

The music of the evening was ably rendered by Geo. Thompson on the piano, Manney Schneider on the violin and Steve Olson on the accordion.

An appropriate lunch was served consisting of cheese and crackers, pickles and accessories. The evening finally came to a close with much well wishing by all, and most of the guests wended their ways home. A few die-hards adjourned to the new home of Mr. Wilf Thompson where Hitler's speech was listened to more or less.

NOTICE

The Red Cross drive for funds in Redcliff will start May 22nd and continue until May 27th. Collectors have been appointed by the local branch and will be calling on all citizens during that time. Any assistance rendered will be much appreciated. Such a cause is worthy of whole hearted support.

NOTICE

There will be no baby clinic during Easter Week. It will commence again however the following week.

Wilfred Thomson Married Last Week

Thompson — Bergman

A wedding of much interest to a wide circle of friends was celebrated in Lethbridge on Friday April 28th 1939, when Helga, third daughter of Mr. J. T. Bergman of Medicine Hat became the bride of Mr. Wilfred Laurier Thompson, younger son of Mrs. M. Thompson of Redcliff and the late Mr. G. Thompson.

Rev. J. M. Pritchard of the United Church officiated at the ceremony which was performed in the Mosque.

The bride looked lovely in a gray ensemble with accessories in wine and wore a corsage of roses.

The young couple were attended by Mr. and Mrs. A. S. Patterson, who had been married themselves only a few hours before.

After a brief honeymoon in Lethbridge Mr. and Mrs. Thompson returned to Redcliff where they will make their home.

Wilf Thompson as he is popularly called is a Redcliff boy, having lived here since a very small child and is well and favorably known. His wife was a very popular member of the younger set in Medicine Hat.

The Review joins with their many friends in wishing them a long and happy married life.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Redcliff Assessment Roll for 1939

Notice is hereby given that the assessment roll of the Town of Redcliff for the year 1939 has been prepared and is now open for inspection at the office of the secretary-treasurer from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value named upon any property, must file a notice lodge a complaint setting with the secretary-treasurer.

Dated this 30th day of May 1939

Gordon Young People Had Memorial Meeting

Their Next Meeting Will Be A Vesper Meeting

The Young People of Gordon Memorial Church met at the home of Rev. H. V. Edson for their regular meeting on Apr. 28. At the close of a short business meeting, the program was handed over to Jack Brydie, convenor of citizenship. The discussion which followed was based on Sunday and its rights. Games were played and refreshments served, after which the remainder of the evening was spent in playing Bingo. Carol Selhorn wore the highest points. The weather permitting, the next meeting will take the form of a vesper service followed by a camp fire. Curt Buchholz will be in charge.

Fine Carnival For Two Days May 19 and 22

Fine Lot of Games At The Broadway Building

The Park Committee is having a two night carnival in the Broadway Building on May the 19th and 20th at which there will be all kinds of games of chance. Hoop La, bingo, darts, bow and arrow, juggle board, shooting gallery and many other games will be introduced.

All kinds of refreshments will be for sale including ice cream, hot dogs and pop.

It is expected that many outsiders both from the country and Medicine Hat.

Let everyone turn out and make this carnival the best ever.

Can Give Shrubs To The Redcliff Park

Requests that any persons wishing to donate shrubs, trees, perennials or lawns in the new park kindly write or see Mr. M. Rindahl Chairman of the Park Committee or Bert Allison Secretary-Treasurer.

The public are urgently requested to give and help as much as possible.

Mr. P. McDermott who has been seriously ill for the past week is now much improved. It is hoped he will be around again soon.

The new Park is still showing signs of great improvement. Trees have been planted and walks are being laid out.

Brig-Gen. G. R. Pearkes addressed a joint meeting of Rotarians, Klansmen and Kiwanians at a dinner held in the Aminihola hotel on Monday evening. He asked that every encouragement be given the local unit of Militia and stated that while members of the militia could not be sent overseas in case of war unless they volunteered, trained men would serve Canada much better than untrained men, should Canada be attacked.

Two Young Men Married Same Day

Patterson — Skidmore

A quiet but pretty wedding took place on Friday, April 28 1939 at Medicine Hat when Mr. Alexander Scott Patterson son of Mr. and Mrs. Alex Patterson of Redcliff, and Miss Myrtle Skidmore daughter of Mrs. J. Skidmore also of Redcliff and the late Mr. J. Skidmore, were united in the holy bonds of matrimony.

The ceremony was performed by the Rev. W. J. Hollingsworth in the Mausoleum of St. John's Presbyterian Church.

The lovely young bride wore a suit in shades of rust with black accessories and corsage of roses.

The young couple's only attendants were Miss Helga Bergman and Mr. W. L. Thompson who were married themselves a few hours later in Lethbridge.

Mr. and Mrs. Patterson are well and favorably known in Redcliff having lived here nearly all their lives.

They returned to Redcliff on Sunday after a short honeymoon in the southern part of the province, and will reside here in future.

The Review extends to the happy couple best wishes for a long and happy married life.

School Music Dramatic Festival Today, Tomorrow

Being Held in Medicine Hat 1000 Children Attending

Preparations for the School Music and Dramatic Festival being held this week end in Medicine Hat were brought to a close yesterday.

An usual Redcliff will have several entrants for voice and recitations. No dramas are being entered from Redcliff this year and our school chorus will have no competition.

It is expected that 1000 children will be in attendance at the Festival.

The following pupils from Redcliff will be among the competitors:

Soprano Solo, Grades 9 to 12—May Martin and Doreen Cooke.
Solo, Grades 4, 5 and 6—Jacqueline McCleary, Ronnie Leppard, Joyce Balmer and Winnie Phillips.

Solo, Grades 2 and 3—Evelyn Hitchen and Dolores Turner.

Solo, Grade 1—Audrey Gordon and Dora Stratton.

Solo, Grades 7.8 and 9—Betty Balmer, Laurie McIlhard, Muriel Boyle and Bruce Bosasly.

Boys' Open Solo—B. Sheasby, Recitation, Grades 7, 8 and 9—Kathleen Cooke, Beanie Gordon, Harvey Bainbridge and Colleen Jacobson.

Recitation, Grades 1, 2 and 3—Dolores Turner and Annie Balmer.

1939

Watering Hours

From 6:00 A. M. to 10:00 A. M. 5:00 p. m. to 9:00 p. m. Effective on and after May 4th. The use of hose without sprinkler or nozzle is prohibited.

By Order Water Com.

Messrs. Robert and Peater McDermott of Montana, brother and nephew of Mr. Pat McDermott of this town arrived here last Monday to visit their relative who is ill. They left for home today.

The School Festival in Medicine Hat is taking place just now. A number of Redcliff children are taking part.

PLUG SMOKING TOBACCO

An Agricultural Program

With every evidence in support of the statement there appears to be good ground for the belief that the long era of drought which has spoiled the prairie provinces during the past decade is now a thing of the past and that farmers and businessmen have reasonable hope in looking forward to a series of a period of years of sufficient if not plentiful moisture.

Assuming this to be true it is not unreasonable to suppose that most farmers are laying plans involving a definite agricultural production policy which they hope to be able to carry out as closely as the same way as the business man has to do, for he is to be assured of some degree of success in his ventures.

With agriculture as in the commercial world, any long range policy which may be laid down for future guidance must necessarily be elastic to take care of unforeseen circumstances which may arise, to provide for contingencies which had not been thought of and to meet changing conditions which are ever present and frequently cropping up in a world which is subject to frequent changes, even violent ones, at times.

Despite these unanticipated conditions, however, a policy or plan should be laid down for future guidance and adhered to as closely as future circumstances permit, on the farm, in the store and in the warehouse. A goal cannot be reached unless a definite pathway towards it is laid down and pursued. It may be necessary at times to make detours, but these detours should eventually lead back to the main highway. In other words a following of the will of the wind can lead nowhere, in agriculture, any more than in commerce.

Self Sufficiency

Similar as the agricultural industry in the prairie provinces is concerned, the lessons of the past few years combined with present day world, national and local conditions appear to indicate that, given sufficient moisture in precipitation or storage, it is highly desirable that every farm produce as nearly as possible everything that will provide for the sustenance of its occupants, as an insurance policy against future want or the necessity of falling back upon the country for the necessities of life.

Apart from a crisis of some kind which will provide for the farmer to provide those things which he cannot produce from the land, the raising of sufficient foodstuffs on his own land to provide for his own family will appear to be the first objective of a well-developed plan of agriculture.

It would seem desirable, as far as it is feasible to do so, that every farm should produce its own supply of meat, dairy products, vegetables and even fruits, for recent experimentation has demonstrated that an ever widening range of fruits can be produced on the prairie, even apples and plums. It is true that some of the larger tree-borne fruits produced on the prairies are not equal in size and quality to similar fruits raised in British Columbia and California, nor are they as easy to grow under mid-continental climatic conditions, but they can be grown, they can be processed at home in various ways that make them quite palatable and they are better than none at all.

As for vegetables, all except the most exotic varieties, it is now well known that the very finest of these consumables can be grown to perfection on the prairie. It is not necessary to enumerate varieties here. In every district there are one or more farmers growing them, or who have grown them in abundance and the information is readily available from the departments of agriculture, and the information of the experienced and demonstration farms operated by the government or under government direction.

Water Involved

Always provided, of course, that sufficient water is available, there appears to be no reason why all these beautiful foods—meats, butter, milk, eggs, cheese, vegetables and fruits should not be raised on every farm, at least in sufficient quantities to supply the families dependent upon them, and perhaps a surplus to exchange with neighbors or, where local markets are available, to sell.

Where natural water is not available such a program necessarily entails the planting of trees and their subsequent care, but with trees and shrubs available from the government without cost, this need be no deterrent.

It is true that such a program entails a considerable amount of labor, but the days when the farmer could throw some seed in the ground, take on a bountiful cash crop in the fall, dispose of it for a good price and bank on California beaches the rest of the year have evidently gone, perhaps for ever.

It is quite evident that the time has now come, even with plenty of moisture available, that the pursuit of agriculture on the prairie, to be successful, will involve close attention to the job the year round and that means a great deal of work, but after all for the great majority of people a modicum of success is only obtainable through work and plenty of it. A program mapped out to cover a period of years ahead, plus intelligent application of labor will get at least some distance towards ensuring a partial rehabilitation of agriculture in the west, even during these difficult times, and perhaps distant times ahead.

Has Out Of Words

Mrs. V. Dougherty neither minced nor nerved words in describing her husband as she filed suit for divorce at Pink, Minn. Mrs. Dougherty said her husband was "vain, mean, irritable, morose, disagreeable, nasty, grumpy, cold, miserly, jealous, heinous, playful, lecherous, dishonest, brazen, miserly, glib, untruthful, temperamental, selfish, contemptuous, inattentive, unskillful and inconsiderate."

For Your Information

The Edinburgh Dispatch gives a selection of "howlers" from the collection of a Lakeside teacher: "The royal min is what the king puts on his royal hands."

An appendix is a portion of a book which nobody has yet discovered to be of any use.

Gravely was discovered by Isaac Newton. It is chiefly noticeable in autumn, when the apples are falling from the trees.

Jackie ball and rope jumping were games played by the ancient Roman children.

Percentage Is Lower

Five years ago air line publicity people estimated the percentage of air-rick passengers approached three or four per cent. Operation at higher altitudes during recent years—between 4,000 and 10,000 feet—has cut the amount of air-rick passengers down to three per cent of every landing. Air sickness is less frequent than sea sickness.

Meade Youth Movement

Princess Paul of Greece, brother and heir of the King of the Hellenes, is a qualified pilot. His favorite sport is the weather is too bad for flying is sailing on the rough seas. He has a splendid small British-built sailing boat in which he has won several trophies. Recently interested in physical fitness, he is leader of the Greek youth movement.

Westchester, Mass., was the first city in America to buy land for a city park. It purchased 27 acres for Elm Park in 1854.

Europe's principal exports now are refugees. 2501

Discuss New Agreement A Useful Language

Under Which Canadian Press Will

Extend Service To CBC

A new agreement between the Canadian Broadcasting Corporation and the Canadian Press, under which the CBC will be given extended news service was discussed in the common radio committee at Ottawa.

Mr. H. H. Murray, CBC, (Editor-in-Chief) asked Glenora Murray, CBC general manager, for particulars of the agreement.

Mr. Murray said that for the past year or so, the Canadian Press has supplied the CBC with news headlines free of cost.

The CBC proposed to greatly extend its news on the air and The Canadian Press had offered to provide the additional service and be paid only for the cut-of-pocket cost entailed in the preparation of bulletins, which was estimated at \$25,000 a year.

"I do not wish to criticize this agreement," said Mr. Murray, "but The Canadian Press has the largest news service, which disrupted continental European news from a French viewpoint."

Mr. Murray said that the CBC was secured through British sources giving a British viewpoint.

Expenditure Would Contribute Largely To Registration Work

It is a little over 10 years since a Polish eye doctor devised a new and improved language he called Esperanto, which, he hoped, would be taught in every country so that one day it would become an auxiliary universal language enabling people in every country to talk or write to each other.

Progress has not been made to the extent anticipated by the inventor or those who took it up, although at the present time there are about a million people who are Esperantists.

There seems, however, to be a quickening of interest. At a convention in Edinburgh recently a high school teacher from Aberdeen reported that in his school voluntary classes were formed and over one hundred boys were learning the language rapidly.

Although the classes were already carrying on correspondence with other Esperantists in France, Holland, Sweden, Denmark, Norway, Bulgaria, Hungary, Czechoslovakia and Yugoslavia. It was also revealed that Esperanto is being taught to the accomplishments of British Boy Scouts and a national shield is being completed for it.

It is certainly a remarkable and interesting thing that schoolboys with only about a year's study should be able to correspond with people in nine other countries. Ten countries and ten languages but all to write and speak the same tongue. Obviously valuable and interesting friendships are being formed, enabling these lads to understand the viewpoints of each other. If Esperanto were taught in every school throughout the world what a useful thing it would be. Not only would people feel more disposed to travel to lands where they had friends of other nationalities and get to know each other and the countries better, but it would be a great source of international understanding, helping to dispel international difficulties.

Esperanto seems to lack friends in high places but if boys and girls were required to learn it as a secondary language instead of French, German, Italian, and the rest, it would simplify education and contribute to the peace of the world.—St. Thomas-Times-Journal.

A Good Foundation

Sermon On Mount Once Suggested As Guide For British Foreign Relations

Several years ago, in the British House of Parliament, a member made a statement of principles which he believed should guide the foreign relations of the Empire. He went on to say that he believed the policy should be based on the Sermon on the Mount.

At this point another member rose to protest, saying, "Gentlemen, gentlemen, if you are going to base the foreign policy of the British Empire on the Sermon on the Mount, then all I have to say is 'God help them'."

The other speaker, answered, "And He will."

National Veterans' Survey

Appeal Is Being Made For Voluntary

Registration Work

To further the plans of the veterans' organizations to make a national veterans' survey, decided upon at a conference of the presidents of the national veterans' organizations in Toronto on January 28, committees are now being set up in each province to conduct registrations of returned men and women.

The Dominion committee stresses that information as to resources of the personnel available in case of national emergency arising out of the intense international situation, for service in Canada, will be on hand.

The Dominion committee stresses that enrollment is entirely voluntary, does not constitute enlistment in any sense and imposes no obligation, but information is required as to the numbers who might be available if required, their location and details of their qualifications and this applies to all men and women who have served previously in any capacity.

It is pointed out that a great deal of this information will be available from ex-servicemen's organizations operating in the several provinces, but there are many veterans who are not members of these organizations and they are being asked to register at the nearest branch of such an association.

An offer to conduct this survey was made by the national veterans' organizations to the Federal authorities and was accepted.

True Facts About Hockey

English Manuscript Of 1537 Tells Of Its Early Origin

"Hockey, played on grass, with a ball instead of a puck, was invented in England about 60 years ago," says the Stratford Beacon-Herald, "and for hockey, although now regarded as the supreme winter game in Canada, owes its origin to the fact that when some young men came from England as members of a government's staff, they played hockey on the frozen rivers and ponds for recreation."

The fact is, however, that ground hockey in the Old Country, in one form or another, is a very old game. A manuscript of 1537 refers to the "hurling" (hurling) of the little ball with hooked sticks or hoops.

What was perhaps not very different from that was also called bandy in England, shinty (or shinty) in Scotland, and bandy in Ireland. Bandy (shinty) referred to the end of the stick, as it sometimes refers to the hand, and sometimes to the stick.

"Bandy" words in sending the conventional ball (or puck) back and forth—just an old hockey custom.—Toronto Star Weekly.

IT POURS CLEANLY

The heavy pouring spout for the two pound tin. It's free—write for one NOW

Plus the special top of the 2 lb. tin of Crown Brand, 100% White and Kero syrup.

It's easily cleaned and can be used over and over again.

WORLD HAPPENINGS BRIEFLY TOLD

Col. René P. G. Weller, air attaché of the French Embassy, revealed that France now has ordered 715 American-made fighting planes.

South Africa will spend more than \$25,000 a day on defence in the year 1939-40, according to estimates tabled in Parliament.

The British government disclosed the admiralty had asked for the abolition of the centuries-old punishment of flogging in the Royal Navy.

The government plans to introduce legislation to limit liability in air crashes, Hon. C. D. Howe, minister of transport, said.

The House of Commons civil service committee recommended establishment of an appeal board to deal with grievances and other matters affecting civil servants.

Naturalist Jack Miner has received word from C. C. Atwood of Lakeland, Fla., of the death of a bird in March this year of a robin tagged at an American sanctuary here in 1934.

An unprecedented relief loan to British Columbia has been renewed for another year by an order-in-council tabled in the House of Commons.

A wooden totem pole figure of an eagle, carved by Kwakiwilt Indians of northern Vancouver Island, has been acquired by the British Museum. The grim-visaged eagle stands about four feet high.

Goods exported through British Columbia ports during January and February of this year were worth \$25,480,269, according to first monthly figures compiled by Statistics Canada, the provincial bureau of economics and statistics.

Helped The Blind

How School For Blind Children Was Established In Vancouver

How a chance conversation with a stranger led to the establishment of a school for blind children in Vancouver was disclosed by Victoria's Burke, 80, who sold newspapers on a downtown street corner for 18 years after he lost his own sight in a mine explosion at Portland, Canada, N.C.

A sympathetic seamstress, C. R. Pitman, stopped to chat with Burke 24 years ago and became so interested in the efforts of the new educator and his wife to aid blind children that he persuaded the department of education to grant them official status.

Burke told Pitman how his wife, a native of Australia who had been blind since birth, was teaching a neighbor's sightless child how to lead a normal, active life. He said there were other children in Vancouver who would benefit from similar training but were unable to get it because their parents could not bring them to the Burke home.

When official recognition was accorded, Mrs. Burke was named as instructor and a sighted man was named to care for the children outside school hours.

Classes were conducted in the Burke home until some 20 children from all parts of British Columbia were attending and the school was moved to new and larger quarters which are still being used. Mrs. Burke continued as instructor until her retirement in 1923.

A New Tartan

Will Be A Mutual Badge For Scotchmen Across Canada

Scotchmen of Canada will soon have their own tartan, designed by Hattie Cochrane and George MacBeth of Victoria. It has been proved by the St. Andrew's and Canadian Society of Victoria.

In address to members of the Women's Institute Weavers' Guild, Mr. Cochrane described the suggested tartan.

It has a ground color in dark green, in mixtures, representing the prevailing background of the planned landscape in Canada, and the checking and counter-checking are of blue and white as in the national flag of Scotland, with the red and golden yellow of the royal standard. Black was also introduced, he said, as signifying dignity with the green.

Thoughtful caution, the aggressive red, the blue of loyalty and white of purity. Mr. Cochrane said the new tartan, which calls for the use of Canadian wools, may serve a useful purpose in establishing a mutual badge across the Dominion among all of Celtic and Scottish affiliations.

Automobile manufacturers and that in prosperous years bright colored cars gain in popularity, and lose favor in harder times.

Tops shipped from Germany to the United States last year were valued at \$44,546, a decrease of 20 per cent. from 1937.

Reward For Ambition

Opportunities In The World For Young Men Who Wish To Get Ahead

Speaking of opportunities in the world for young men of brain and ambition, Lord Birkenhead once said there were still "glittering prizes for every winner."

Comes William O. Douglas, appointed to the Supreme Court of the United States at the age of 40, to support this claim. Douglas, the son of poor parents, worked as farm hand and dishwasher to get money to attend college. While at university he lived for three years in a tent to conserve his slender resources. He left university to become a high school teacher, but in time abandoned that to study law. He arrived in New York to go to the Columbia law school with six cents in his pocket, whereupon he borrowed \$75 from a friend and then proceeded to write a text-book in six weeks which netted him \$1,000. To-day, after only 14 years of law practice, including time as head of the Securities and Exchange Commission, he goes to the Supreme Court, the youngest member that august bench in 150 years.

William O. Douglas was blessed with the dream of ambition. But he had as well ambition, fortitude, to go places. What ability for him may be won, to a degree at least, by any other young man with the same qualities.—Ottawa Journal.

PUTTONEUT "SLENDERIZER"

By Anna Adams

3 cups flaked salmon
2 eggs with salt
1 tablespoon chopped parsley
2 medium lemons
1 teaspoon prepared mustard
10 C. C. Cream
Crackers (crumbled)

Puttioneut pepper
1 tablespoon melted butter
2 eggs with salt
Add other ingredients in the order signature will be placed on the order

In a greased bread pan and bake in hot oven (425 degrees F.) 30-40 minutes. Serve with Egg Sauce:
1 cup medium cream sauce add 1 chopped hard boiled egg. Fry 5 minutes. Six-eight portions.

DEVILLED SHREDDED WHEAT

4 or 5 Shredded Wheat
2 eggs with salt
1 cup cream Canadian cheese
1/2 cup melted butter
1/2 cup freshly-mixed mustard
1 teaspoon Worcestershire sauce

Paprika

Bait
Salt
Heat in a moderate oven of 375 degrees F. 30 minutes

Mix the cream with the milk, mustard and Worcestershire sauce. Add salt to taste. Spread on the split biscuits. Sprinkle with paprika and place under broiler heat till cheese is melted and lightly browned. Serve hot. Makes 12 portions.

Puttioneut pepper

A New York dentist has given up his practice and become the leader of a dancing band. "The Yanks are coming."

The population of the continental United States on July 1, 1938, was 130,215,000.

The world's longest pipe line is located in Asia Minor, and is 1,130 miles long.

There are 40 million Ukrainian people, most of them in Russia.

Doilies Crocheted Round and Round

Household Arts by Alice Brooks

Filet Crochet Doilies Buffet or Luncheon Set Are Yours to Make

What fun it is to set the table with lovely doilies of your own making—ones that are sure to be admired! Here are unusual but easy to make doilies that are worked round and round in a simple chart that's fun to follow.

These are three convenient sizes—the large doily is lovely as a centerpiece. Remember to make the doilies in the colors of your own choice. Instructions and charts for making doilies; illustrations of them; materials needed; and a list of dealers who can be contacted for more information cannot be accepted to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Famous World War

Surgeon Who Introduced "Bijp" Treatment Of Wounds Is Dead

Professor J. Rutherford Morrison, the famous plastic surgeon who, during the war, introduced the "Bijp" treatment of wounds, died at 85. He was a New Zealand surgeon who, during the war, introduced the "Bijp" treatment of wounds, died at 85. FIRESTONE EXHIBITS FARM AT WORLD'S FAIR

Probably the most unique and appealing part of the great Firestone exhibit will be the actual life-size reproduction of a thriving farm with live stock, buildings, farm implements, and all. This part of the exhibit will demonstrate how the farm is being modernized by the use of rubber tires on every wheeled farm implement, and will call attention to the fact that it was Harvey S. Firestone on his own 50-acre farm who pioneered in the development of rubber tires for farm use.

A 24-acre exhibit at the World's Fair in New York is being completed by the Firestone Tire & Rubber Company. In addition to a full-scale reproduction of a thriving farm with live stock, buildings, farm implements, and all. This part of the exhibit will demonstrate how the farm is being modernized by the use of rubber tires on every wheeled farm implement, and will call attention to the fact that it was Harvey S. Firestone on his own 50-acre farm who pioneered in the development of rubber tires for farm use.

Hot Place For Motoring

Travelers In Australia Found Bath Salts Melted In Sulfates

Motoring in hot weather in Australia takes some thoughtful consideration and the country has just come through one of the hottest summers on record. Miss Helen Oldham describes in the Argus some of her experiences.

In a certain town Miss Oldham and her friend discovered they were the first and last travelers to be turned away from a night at the hotel. Not a bed was to be had and discomfited tourists were moving on to the next stopping place.

One of Miss Oldham's worst fears on the trip was that chocolate, packed among her clothes, might melt in the heat. On arrival in Melbourne, where suitcases were taken out of the car, there was an odd-looking mess at the corner of one case. It was orange in color and rather powdery. On careful investigation it proved to be bath salts!

In the heat the crystals had melted! They left Melbourne for Adelaide where the temperature was soaring to 100 degrees but before they had travelled 50 miles it seemed more like 120. And this for 500 miles.

Method Proved Disastrous

Bulgarian Postmaster Had Great Idea For Collecting Stamps

For stealing more than 50,000 letters in an attempt to obtain the stamps on the envelopes, Yassal Naidenoff, 43-year-old postman, has started to serve a year in prison in Sofia, Bulgaria. He had practiced his unique method of stamp collecting for 12 years before he was detected. After securing the stamps, which he kept in boxes, Naidenoff threw the letters into his cellar without touching the contents. When examined by postal officials after his arrest, the letters were found to contain gossip, currency and documents valued at \$7000. The currency included American, British and French bills.

Gardening

First Vegetables

First vegetables to be planted in the spring are spinach, all sorts of lettuce, radish and peas. Once gardeners were advised against the growing of peas, which might not be in the soil, cold ground. There is less danger of this, however, and the danger crops invariably come from early planting.

With most vegetables it is advisable to make at least three sowings, and to sow the first sowing as early as possible. This will result in a continuous supply of green peas from mid-June until mid-July.

Proper thinning, frequent cultivation and an occasional application of liquid manure will keep the peas growing quickly and quickly growing makes for a good crop.

Pruning

The main object of pruning, whether it be rose bushes, fruit trees or flowering shrubs, is to open up the center of the growth so that sunshine and air may penetrate freely and, also, of course, to produce a symmetrical plant. Naturally any branch which is crowded, or which is removed and also branches that rub against each other.

Easy To Have Flowers

Many people think that a beautiful garden is impossible. Far too much soil and work are required, they believe.

These notions are wrong, according to authorities on the subject. There are gardens that fit almost any situation. For those people who have neither the time nor inclination to devote to the garden, there are plenty of annual flowers that thrive on neglect. A little digging of the ground in late spring is all that is required.

Take such things as Alyssum, Dianthus, Marigolds, Portulaca, California Poppies, for sowing. These are flowers that almost care for themselves, have plenty of color, and are easy to grow. They are easy to grow, and they are easy to grow.

For the center of beds or near the back of flower beds, such as Calceolarias, Nasturtium, Poppy and Phlox are good. For the front of beds, such as Calceolarias, Nasturtium, Poppy and Phlox are good.

When a passage that especially pleased him had been written by William Macdonald Thackeray, he clapped on his hat and rushed out to find a friend to whom he might read it.

At Kato University, Japan, a granite monument has been erected to the memory of the departed friend, which have contributed their part to scientific research.

The weight of an eagle alone, as it drops with terrific force from a great height, is enough to break the back of a good-sized animal.

Sap from bottle trees quenches the thirst of Australian natives in time of drought.

Chemists do not know exactly what the cause of the disease is, but when milk turns to butter.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST

World Place Embargo

British Paper Suggests Ban On Shipments Of War Materials

Marshalling of the peace-minded states of the world against economic bloc against the exportation to aggressor nations of war materials was suggested yesterday by The Financial News of London.

The Financial News takes the lead in effecting the embargo, the paper declared with the co-operation of the United States and some smaller countries. A high percentage of most vital commodities could be withheld from powers threatening the world's peace.

"Surely it should be possible (quite apart from the question of political alliances) for the nations to ensure that it is not from their resources that these commodities—the raw materials of war—are drawn," The Financial News said.

The paper cited Canada's position with regard to nickel exports.

As producer of 90 per cent. of the world's nickel, it pointed out Canada had supplied three-quarters of Germany's requirements. Considerable inconvenience, the paper said, would be caused by cutting off these supplies, but it was equally obvious a mere embargo of Canada's nickel would prove futile.

The editorial proceeded to "make the case, reasonably effective, for a general embargo of the raw materials of war." It pointed out that this in turn would solve problems of compensation and perhaps involve political guarantees.

"It is clear that the difficulties are great and that the more simple method might well be to cut off Germany's purchases at the source by a general embargo of exports and so reducing her foreign exchange."

Opposed in official circles on the ground that it might provoke further aggression, the paper said, the fact that as yet Germany has shown no move for provocation. It begs the fundamental question of the value of intelligence and the will to stop aggression."

To Prevent Accidents

New Scheme Uses Lites Motorist See The Other Side Of Hill

Leasing has made an astronomical looking glass to prevent automobile collisions at the crest of the hills. In the glass a motorist can see the other side of the hill.

Going up, he has a "visibility of 2,000 feet to the opposite side. The device was described by the Greater New York Safety Council.

The glass, 15 feet wide and four feet high, is mounted on a tall central pole, and is a half circle in view of the other side of the hill, is set above the middle of the road and is similar to those used to carry railway signals.

It is made of 17 triangular bars of glass, laid parallel across the face. Each bar is actually a prism, the device used by astronomers to bend light into the spectrum in studying stars.

Three prism bars bend the light rays coming from the crest of the hill to go downward on the other side. It is said to be effective at night.

New Use For Earwax

Dr. Vern Knudsen, professor of light physics of the department of physics at Los Angeles, recommends earwax for eye sleepers. The damage to their health from noise-induced sleep is "unbelievably great," he said, a gathering of scientists and students, and earwax would be of benefit.

Chemists do not know exactly what the cause of the disease is, but when milk turns to butter.

Preparing Seed Grain

The Treatment Of Seed Grains For The Control Of Disease

The health of seed grain is a factor of first importance in determining the yield and quality of the crop. When all of the other factors such as fertility, moisture and temperature are favourable to the production, the crop may be a failure because of parasites which are seed-borne, or because of diseases of the seed. Experiments conducted at the Dominion Laboratory of Plant Pathology at Saskatoon, states H. W. Mead of that Laboratory, have shown that plump seed which is relatively free of disease produces better crops than low quality seed under the same conditions.

Examination of many samples of seed grain from different parts of Saskatchewan over a period of years has shown that some are relatively free of disease organisms. It has been established by experiment that no increase in yield or quality can be obtained from treating healthy seed, but substantial benefits do accrue from treatment of diseased grain. As a preliminary step it is always advisable to have a germination test made and facilities for such are provided by the Dominion Department of Agriculture in each province.

It is possible to rid seed of most of the parasites it may carry, and there are several ways of doing it. Some fungi like that of wheat and wheat are established deep in the seed and the difficult hot water treatment is required to get rid of them. A more practical method of dealing with such a disease is the use of a seed plot which may be rogued. The fungi which cause bunt of wheat, the smut of oats and covered smut of barley are carried as spores and vegetative structures on the surface of seeds or inside the chaff. These fungi particles may be killed by chemical treatment on the surface. Formaldehyde still ranks among the foremost liquid treatments because of its cheapness and its general effectiveness, in spite of its tendency to injure the seed. To be effective, it must be properly applied, otherwise its benefits are not compensated for the injury it causes. It will control effectively the smut of oats, bunt of spring wheat, covered smut and black loose smut of barley. It is not advisable to treat shrivelled and other low grade seed with formaldehyde. Certain copper dusts, such as copper carbonate and basic copper sulphate, will prevent bunt smut of wheat in the absence of soil infestation and will control some of the other diseases of wheat. Copper dusts, on the whole, are relatively ineffective against barley and oats except in bulrush varieties. There are organic mercury dusts on the market which are very effective in the control of bunt of wheat, the smut of oats, covered smut and black loose smut and the stripe disease of barley. These dusts will destroy all the seed-borne fungi which cause bunt and leaf spot of oats, and black chaff of wheat. They destroy the seed-borne fungi which cause seedling blight and if applied not more than a few days before sowing, provide a certain amount of protection against soil-inhabiting organisms that frequently attack germinating seed. A dusting machine of some kind is necessary for the proper application of dust treatments.

Seed treatments do not control stem or leaf rust of cereals. However, any treatment which will aid a quick germination and rapid growth has indirect benefits in the event of rust attacks. This applies also to insect damage, particularly wireworms.

Information on seed treatments may be secured from the Dominion Laboratories of Plant Pathology at Winnipeg, Saskatoon and Edmonton.

Had To Answer

Question: Canibal Chief Asked About War News

This charming story from a Polish newspaper reaches me from the United States, says "Critic" in the New Statesman and Nation, London.

An English missionary, in a chat with an old Negro cannibal of the tribe Niam-Niam, told him of the enormous number of victims of the world war.

"How could you?" wondered the cannibal, "as so many human beings?"

"We whites," answered the missionary proudly, "do not eat human beings."

"Well, then, what did you tell them for?" asked the cannibal in great astonishment.

Upward of 20,000,000 people attended basketball games in the United States in a year.

Argentina shipped nearly 600,000 tons of meat to England last year.

United Kingdom Market

Efforts Being Made To Improve The Quality Of Canadian Products

Constructive steps being taken to improve quality and supply of Canadian products in United Kingdom are stressed in an article in the current issue of Canadian Goods.

The article points out that at the time of the Ottawa Agreements on shipments of bacon were little better than 150,000 cwt. annually. Stimulated by the British preference and aided by an aggressive advertising and promotion campaign our exports have steadily increased. The 1928 figure was approximately 1,300,000 cwt., a slight reduction from the 1937 peak.

Tribute is paid to the efforts made by the Department of Trade and Commerce and by the Department of Agriculture, toward improving the quality of Canadian products and toward the building and maintenance of continuous supplies from this country. Aggressive merchandising efforts by personal contact of a staff of men calling on the retail and wholesale trade is said to have resulted in increased display of Canadian bacon—canadian bacon—in hundreds of retail stores for the first time.

Plans are now being considered for marking Canadian bacon in retail stores with special tags bearing the word "Canadian" and thus retaining its identity.

"This now being done most effectively with Canadian cheese and the latter is now bringing a premium price because of its quality, which is guaranteed by the advertising and promotion effort being put behind it by the Government's 'Canada Calling' campaign and its identity-marking agency."

Lacking recognition such as is granted to some other countries from which Britain draws her supplies, Canadian products will from time to time be in jeopardy. In a recent book "Beating for the Stars" by Nora Walsh, a 43-year-old Pennsylvania Quaker who lived in Germany from 1934 until last April, it is stated that the people are developing a resilience to Hitler as cunning as the Chinese peasants. All the young people in uniforms are old young people. She quotes a maid recently promoted to under-cover agent as saying: "You may think our radio is the voice of our people but it is not. The voice of Germany is a murmur."

That murmur might readily break into a roar under the strain of war conditions.

The tragedy is that thousands of innocent Germans as well as thousands of other nationalities would be slaughtered before Europe could be purged of its mad men—"Toronto Telegram."

High tide in the world is in the Bay of Fundy where there is a rise of 53 feet.

It is better to be small and alone than to be great and cast a shadow.

The long-drawn dory fish is taller than it is long.

The Royal Horse Guards with colour past down the Mall, London, while decorative poles are being prepared in honour of the visit of the French President.

NEW BRITISH AIRCRAFT CARRIER IN NAVAL EXERCISES

The Aircraft Carrier "Ark Royal" and her attendant destroyer "Wren" turn into the wind for the aircraft to fly off the ship during British naval exercises in the Mediterranean.

True Voice Of Germany

Is Not Nazism Or Loyalty To Hitler States Writer

The Germans are a peculiar people and submit rather readily to dictatorship, but the persecution which has taken place must have a lasting effect and does not make for the brand of loyalty which will fight to the death.

Many Germans are submitting quietly for the simple reason that law-abiding citizens puts his hands up when confronted with a loaded revolver.

That Germany has great military strength both in munitions and man power is not questioned, but in a prolonged war—and it probably would be prolonged—Hitler's power would collapse.

In a recent book "Beating for the Stars" by Nora Walsh, a 43-year-old Pennsylvania Quaker who lived in Germany from 1934 until last April, it is stated that the people are developing a resilience to Hitler as cunning as the Chinese peasants.

All the young people in uniforms are old young people. She quotes a maid recently promoted to under-cover agent as saying: "You may think our radio is the voice of our people but it is not. The voice of Germany is a murmur."

That murmur might readily break into a roar under the strain of war conditions.

The tragedy is that thousands of innocent Germans as well as thousands of other nationalities would be slaughtered before Europe could be purged of its mad men—"Toronto Telegram."

Have Never Tasted Candy

Luxury For Children In Central Africa Is Rock Salt

A woman travelling recently in Africa was astonished to find that the little native children in Central Africa have never tasted candy or built eye candies. Their tastes are far more simple. Nothing pleases a little black boy or girl more than to be given a lump of rock salt to eat, so rare a luxury is said in this part of the world. The taste of the rock salt is as delicious to natives as are candies to us—Canadian Children.

High tide in the world is in the Bay of Fundy where there is a rise of 53 feet.

It is better to be small and alone than to be great and cast a shadow.

Radio Programs

International Broadcasts Bring Pleasure From Abroad

The Canadian Broadcasting Corporation had laid out a program of developing a Canadian personality and fostering cultural and educational development through its facilities. General Manager Gladstone Murray told the parliamentary committee on radio broadcasting.

Needs of the rural population would be closely studied, the general manager said. Other matters on the program of the CBC included school broadcasts, improved information services, preparation for possible national emergencies and preparation for the "advent of the visual" in broadcasting.

International broadcasts had brought pleasure to the Canadian people from all over the world, including a comment from Denmark that newspapers there considered the Canadian program last October under the auspices of the International Union of Radio Broadcasters of Geneva had been the best of the world concerts in that series.

An Island Empire

Wealthy English Girl Makes Over "Island Kingdom Near Nassau"

A small kingdom with a British girl as its queen is the island of White Cay, near Nassau. Her father, the Toronto Telegram, is Betty Carstairs, the wealthy English girl who retired there after her ambition to beat Garfield in speedboat racing was abandoned as hopeless.

Holder of these islands lease them to the British Government for 99 years periods, and during their tenancy have absolute control of their territory. They collect taxes for the government, and act as judge, jury and ruler over their "subjects." Mrs. Carstairs has 250 residents on her island, and reports that they admire their "chief" tremendously. She has built her own church, school and hospital, and has organized boy and scout troops and a pretty good orchestra. The clergyman, teacher and doctors are all her personal employees.

Among birds, all members of the Finch family have 13 feathers in their tails.

Rim cuts can be prevented by maintaining proper air pressure in automobile tires.

England still has about 200 extant windmills in its boundaries.

PAGANTRY PRESENT AND TO COME

Solitary Confinement

The Story Of A Man Who Won A Wage

Interest has been aroused by a presentation at Newport, Monmouthshire, when the parents of a youth were sentenced for confining him to his room for two years.

An even longer confinement came to light in the middle of last century, after a wager between Lord Cecil and an American named Walter Hastings. They had been arguing over the effect of solitary confinement on the human mind. Hastings inclined to the view that it was not such a terrible punishment as many people supposed. Lord Cecil, however, refused to agree with him, and jokingly offered £10,000 to any man who would submit to voluntary confinement for a period of ten years.

Hastings immediately took him at his word and allowed himself to be imprisoned in a small room at Lord Cecil's home on May 2, 1860. He was supplied with candles, books and writing materials and fed at regular intervals by servants whom he was not allowed to see.

Hastings kept to his bargain, emerging from his improved cell exactly ten years later, but although only 35 years old he looked like a man of 70. He duly collected his £10,000 from Lord Cecil and returned to America, where he died four years later—Manchester Guardian.

Movies Of Dominion

Are Shown To British School Children In "Canada Period"

Movies of Canada for British school children form part of the "Canada Calling" promotion program of the Dominion Department of Trade and Commerce. Arrangements have been made in schools in two areas to show popular films about the Dominion. For all grades in these areas a "Canada period" has been set aside. In this children see examples of illustrations of food products which Canada sends Britain. They are told how they are produced. Following this the children compete for prizes by writing essays on Canada.

Plastics can be made from coffee, thus suggesting a use for some of South America's surplus coffee bean crop.

Professional ice hockey requires a supply of adhesive tape almost equal in area to that of the rink.

The Creeping Killer

Great Danger To Human Life From Carbon Monoxide Gas

The sombre title of "The Creeping Killer," attached to the campaign against carbon monoxide gas is fully justified, according to officials of the Industrial Accident Prevention Association, because it gives no warning of its existence. Frequent press reports of fatalities throughout Canada draw attention to the fact that the hazard is particularly common in garages. One of the recent instances reported is the case of three men who ran their truck into a garage during the cold weather and left the engine running to warm up the building. Two fatalities were recorded and the third man was found to be seriously ill.

The danger of carbon monoxide is not confined to exhaust fumes from automobile engines. In any process, either in the home or industry, where coal, gas, oil or wood is used as fuel, there is a danger from carbon monoxide fumes resulting from incomplete combustion. Modern industrial processes present a hazard of carbon monoxide poisoning and accidents are checked from the Industrial Accident Prevention Association.

The chief and most common hazard from "the creeping killer" seems to exist in garages, according to a statistician of the Association. The general public as well as industry is exposed to the risk, a special bulletin has just been stamped with clear and concise instructions on recognizing the effects of the gas and on the proper application of first aid.

Symptoms of carbon monoxide poisoning include a ringing in the ears, upset stomach, dizziness, headache, nausea, vomiting, loss of consciousness, convulsions and blurring of the vision. The victim is often powerless to assist himself.

Emphasizing the danger of carbon monoxide, the safety bulletin points out that life is in danger if there is one-tenth of one per cent. in the atmosphere. The victim is often the standpoint of reasonable ventilation. If it is necessary to run an engine in a garage, seal the doors and windows are opened.

A check is recommended of the radiator and motor; for leaky exhaust pipes, loose floor boards, and defective exhaust pipes and mufflers.

Deep closed cars reasonably ventilated and avoid the growing tendency to keep all car windows closed during winter months. The first sign of a headache or drowsiness, stop the car and get out until the fresh air blows up the windows.

The bulletin warns against giving to patients any headache powder or other medicine which contains monoxide fumes. It is said such drugs can only serve to deepen the warnings to inhale carbon monoxide gas. In longer and more serious exposure to this poisonous gas, there have been cases of permanent brain damage and trouble following the administration of such drugs in gas poisoning cases.

A Rich Market

Canada Holds First Place In Britain For Artistic Paper Group Of Firms

The place of Canada in the rich British market is reported by the Dominion Bureau of Statistics in an analysis of the United Kingdom's trade for January.

For that month Canada held first place in the British market for an important group of commodities, including wheat, wheat meal and flour, fresh apples, canned lobsters, aluminum and alloys, copper, unwrought nickel, zinc, non-ferrous metals and manufactures, wood and manufactures of wood and timber, paper and cardboard.

Such a market is for Canada a tremendous asset, worth every effort directed towards its maintenance and development—Ottawa Journal.

Chinese Justice

A court over which white men has an easy found a Chinese to be a first for the Chinese cause and guilty of an insult to Generalissimo Chiang Kai-shek, head of the Chinese army.

He was sentenced to six of \$100 and a half-hour periods through Toronto's Chinatown carrying a placard bearing the words "Traitor to China."

The millions of seawater is as soluble to the saltiness of human blood that tissues are kept alive in laboratories in modified seawater solutions.

Many Philippine natives still build their homes in trees.

**IF there were
 NO
 Life Insurance**

IF there were no life insurance, millions of Canadian
 citizens would dread the future. Many men would be
 powerless to protect their loved ones. Thousands more
 families would be "no relief".

Fortunately there IS life insurance - and Canadian
 families can face the future unafraid. Through their sav-
 ings in life insurance, men and women (1)
 guarantee financial security for their fami-
 lies; (2) provide funds for educating their
 children; (3) protect their own old age.
 Each and every working day, policyhold-
 ers and their beneficiaries in Canada receive
 more than Five Hundred Thousand Dollars
 from their life insurance savings.
